VISION

THE AMANA NEWSLETTER

Now even more impressive...by design.

Wine Cabinets? 2006 is a very good year.

New to the Amana collection...superb Wine Cabinets designed to perfectly complement the Reflection, Definition and Precision ranges. But these are not just any Wine Cabinets. Built to the exacting standards you would expect from Amana, these cabinets offer your customers the ultimate wine storage conditions, with no fewer than three zones...one to keep all your wines at the optimum storage temperature, and two others designed to bring red and white wines to the ideal temperature for drinking.

New 3D. Sheer practicality meets stunning good looks.

Nothing represents the new vision for Amana better than the introduction of the 3D model to each of the marque's three fabulous designs. Combining a huge interior space with an ergonomic door layout, your customers can now enjoy the ultimate in contemporary styling and advanced refrigeration technology, in an appliance

designed to deliver class-leading performance...even when space is at a premium. That's because 3D's twin refrigerator doors open wide but need only a small opening arc to do so. And the easy-glide freezer drawer brings all its contents into easy view...and reach. Stunningly simple. Simply stunning.

WELCOME TO VISION

Welcome to the first edition of Vision...the new Amana newsletter designed to keep you fully in the picture on all the important news, our new products and all the latest information on prices. Vision...your twice-yearly insight into our developing range.

Amana... simply perfect.

How do you make the world's most desirable refrigeration an even more attractive proposition? Simple. You focus on the most popular lines and make it even easier to choose. For 2006 that's exactly what we've done.

First your customers can choose between the stunning impact of Reflection, the clean inspired image of Definition, or Precision's immaculate lines. Then they can opt for the best layout to suit their lifestyle...and the space available in their kitchen. There's the traditional American side-by-side, the BxM with the innovative pull-out freezer drawer, the new 3D model combining sensational storage with ergonomic design and the new Wine Cabinets to keep your collection in perfect 'cellar' conditions. And, finally, they can specify a number of options and accessories to personalise their refrigerator or assist with the installation. Easy to choose. Easy to sell. Easy to see why it's best.

Panel Kits

Some customers want a refrigerator that 'disappears' into the cabinetry, something that matches the finish of the rest of the kitchen. The Panel Kit is ideal for this and is available for the Amana BxM and for the SxS, whether it's specified with, or without, ice and water.

In order to install a panelled refrigerator you will require the following:

1. The relevant base model. See brochure or price list.
2. The Panel Kit for the base model. See table opposite.
3. If the base model has an ice & water dispenser, you will need to order a BFNK5B dispenser (free of charge when you order a Panel Kit) to replace the original base model dispenser.
4. Panels must be 6mm thick at the edge to ensure a perfect fit into the panel fixings.

The Panel Kit is comprised of the following:

1. Detailed instructions.
2. Top and bottom door panel mountings with fixings.
3. Door side panel trims with fixings.
4. New handles with fixings.

Fitting the kit requires the installer to do the following:

1. Remove the door from the appliance.
2. Fit the top and bottom door panel mountings then remove the existing door handles.
3. If the appliance has an ice and water dispenser, it must be replaced with BFNK5B dispenser to ensure that panels are held securely.
4. Fit the new door handles to side of door using fixings.
5. Remount the doors, slide in the panels and fit the door side panel trims.

SXS PANEL KITS

HTBK204B	Black metal handles and trims
HTBK204S	Stainless steel handles and trims
BFNK5B	Panel Kit Dispenser (Free of charge when ordered with a Panel Kit).

BXM PANEL KITS

HTK531B	Black trims and handles
HTK531W	White trims and handles
HTK531S	Stainless steel handles and trims

SXS PANEL SIZES

Door	Width	Height
Refrigerator	481mm	1695mm
Non I/W door	354mm	1695mm
I/W Door upper	354mm	460mm
I/W Door lower	354mm	815mm

BXM PANEL SIZES

Door	Width	Height
Refrigerator door	905.8mm	1068mm
Freezer door	916.9mm	590.6mm

Build-in Kits

We recommend a gap of at least 10mm on each side and 25mm on top of our refrigerators is left to ensure adequate ventilation and ease of installation. Sometimes this gap can spoil 'the design statement' the consumer is making. Our Build-in Kits are designed to address this with our 'doors only' clad models. It is important to note that if the Build-in Kit is to be used, the gap between the appliance and the cabinetry must be increased to 40mm from the top of the appliance to the under surface of the top cabinetry, and 45mm down both sides. (Build-in Kits are only to be used on Definition and Reflection models.)

Contents. All the kits, whether SxS or BxM, have 5 pieces. 1 x top piece, 2 x L-shaped sides (to be screwed to cabinetry), and 2 x L-shaped pieces (which are secured to the appliance with permanent double sided tape).

Fitting is straightforward. First secure the headpiece into position with screws. Then secure the 'cabinetry L-shaped' pieces (identified by the screw holes) to the cabinetry. Then secure the 'appliance L-shaped' pieces (identified by the adhesive tape) to the appliance. Slide the appliance back into position and level.

Wine Cabinet to Refrigerator Joining Kit

This kit provides an integrated look when locating a wine cabinet next to a refrigerator. NB. To avoid doors clashing, we recommend the wine cabinet is only located to the right of the refrigerator. The kit consists of a replacement stainless steel top box, which when fitted, raises the height of the refrigerator to match that of the wine cabinet. The joining strip, with a width of 50mm prevents the refrigerator door from hitting the Wine Cabinet. Different kits are required for different combinations so please contact your Area Sales Manager or our Customer Services team on 01737 231 000.
